

Channel Islands Audio PLC•1 MKII

Passive Line Controller

The Ultimate Passive Audio System Controller

Our new PLC•1 MKII Passive Line Controller is the ultimate passive audio system controller, offering unsurpassed sonic purity, flexibility, and convenience.

Control at your fingertips

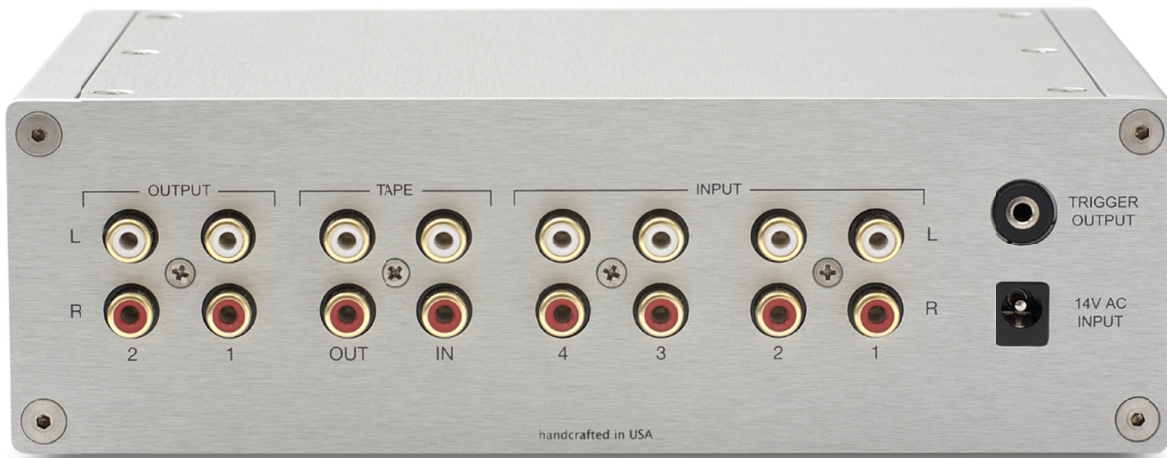

The RC•1a Remote Control system allows for complete control without ever leaving your listening chair. Volume, Mute, Input scroll (up/down), Tape Monitor, and direct access to any input are at your fingertips. A 12v trigger output can also be controlled by the remote to turn on/off other devices (amplifiers, etc.)

Route your audio where you need it

Four standard audio inputs and a tape loop allow for up to five audio sources. The fourth input can be internally configured as a Home Theater Bypass Input. Input display uses sequentially illuminated blue LEDs for easy identification from across the room, and an orange LED for tape monitor. Two pair of output jacks are provided for bi-amping, sub-woofers, etc.

Premium parts and construction

Audio signals are switched by highest quality relays with gold-plated contacts, then fed to a custom ALPS® Blue Velvet motorized potentiometer. Circuit boards are gold-plated and assembled with lead-free silver solder for best conductivity. Our beautifully custom machined aluminum chassis, knobs, stainless steel hardware reflect the quality of circuitry inside, and remote functions are duplicated on the front panel for maximum convenience.

Specifications

Audio Inputs:	4 pairs standard (one of which can be configured as HT bypass) 1 pair tape
Audio Outputs:	2 pairs variable/ 1 pair tape (fixed level)
Accessory Outputs:	12V DC Trigger
Potentiometer:	10k ohm ALPS Blue Velvet (motorized)
Remote Control:	Operational Range: 30 ft Batteries: 2X AAA (Included)
Power Supply:	14V AC/850mA (external)
Dimensions:	8.5"w x 2.75"h x 6.5"d
Warranty:	5 Years Parts & Labor
