

Channel Islands Audio VAC•1

Upgrade Power Supply

VAC•1 is the perfect upgrade for our source components. The upgrade yields improved bass definition, dynamics and noise performance. Available in 120v and 240v input voltage (selectable by solder-in jumpers). IEC type AC socket for use with aftermarket power cords. AC input and output cables included.

VAC•1 is compatible with the following CIAudio Products:

VDA•1 24bit/96k Digital/Analog Converter
VDA•2 24bit/192k Digital/Analog Converter
VPP•1 MM/MC Phono Preamplifier
VHP•1 Headphone Amplifier
VHP•2 Headphone Amplifier

***Not intended for use with products from other manufacturers.**
